

## Problems we came up with

Noise pollution

Navigation using  
echolocation

Re-usability of heat  
waste

Mapping unknown  
terrains without any  
external technologies

Maze navigation

**Common theme**

A red line is drawn across the diagram, connecting the five problem boxes. It starts at the top of the 'Noise pollution' box, goes up and over the 'Navigation using echolocation' box, then down and around the 'Re-usability of heat waste' box. It then goes down and around the 'Mapping unknown terrains without any external technologies' box, and finally up and around the 'Maze navigation' box, ending at the 'Common theme' label. This line suggests a common theme or relationship between all five problems.
